

Pilot phase for “stop-clock” mechanism for evaluation of applications for registration of New Drug Applications under “1+” mechanism

1. E, Efficacy ; Q, Quality; S, Safety
2. Core Team : Core Team of Expert Group on Drug Registration; Committee : Pharmacy and Poisons (Registration of Pharmaceutical Products and Substances) Committee
3. Application will be passed to the Committee for decision once the cumulative response time (excluded from the processing time) has reached the maximum of **120 calendar days**.
4. Target cumulative evaluation time is within **150 working days** for applications under “1+” mechanism and **100 working days** for those with priority review recommended by the Hospital Authority.
5. Target cumulative evaluation time (within **100/150 working days**) excludes the applicant’s response time (limited to **120 calendar days**).
6. The cumulative evaluation time does not include the time for inspection and follow-up by the Drug Office GMP inspectorate.
