

PHARMAESSENTIA · HONG KONG

Hong Kong Updates

28 Aug, 2026

Biweekly report to Headquarters · Internal use only

Executive Summary

COMMERCIAL PERFORMANCE

YTD REVENUE (28 AUG), USD

1.33M

Regular visits to clinics and hospitals continue.

MARKET ACCESS & COMMERCIAL STRATEGY

Agreement with DKSH and budget are under review.

Target date to start the preparation of the drug advisory committee submission is in **Sep 2026**.

RESEARCH AND DEVELOPMENT

- **SURPASS ET:** Second SMO was identified. Initial quotation looks more competitive than the first one.
- **PRELUDE PV IIT:** Further discussions with institutions will be required.

MEDICAL AFFAIRS & KOL ENGAGEMENT

Taipei ET Event (18 Sep 2026)

All logistic arrangements have been completed.
Slides content is under discussion with Prof. Gill.

JSH 2026 (9–12 Oct 2026)

All logistic arrangements have been completed.
Slides content is under discussion with Prof. Gill.

REGULATORY AFFAIRS

250 mcg dosage form and ET submission will be prepared. RA team is preparing relevant documents. KLN Pharma is checking whether the Japan HIDAT reference is acceptable for HK HIDAT submission. Target ET label submission in **Sep 2026**.

RWE Collaboration with Prof. Gill

Global medical team is discussing the following

3 + 1

HU studies with thrombotic and hemorrhagic outcomes, plus one ropeg study from Prof. Gill's group

POTENTIAL PROJECT UNDER DISCUSSION

Comparison of hematologic outcomes between HU and ropeg, based on the identified studies.

Open question to Prof. Gill: scientific value, clinical relevance, and feasibility of this potential project.

GLOBAL MEDICAL TEAM DISCUSSION (FULL TEXT)

We have identified three HU studies reporting thrombotic and hemorrhagic outcomes, as well as one ropeg study from your group. Based on these data, we are considering a comparison of hematologic outcomes between HU and ropeg. However, as you have already discussed the limitations of HU in this disease setting in your publication and have generated compelling data regarding ropeg, we are uncertain about the additional value that such a comparison would provide. We would greatly appreciate your thoughts on the scientific value, clinical relevance, and feasibility of this potential project.

Regulatory Affairs

ET label inclusion pathway — “1 +” abridged evaluation route

1 “1 +” MECHANISM

Abridged evaluation route will be applied to shorten the usual timeline for ET label inclusion.

2 STOP-CLOCK MECHANISM

Target processing time:

- **150 working days** target processing time.
- The “stop-clock” will be paused upon request for written response from the applicant for supplementary documentary evidence.
- “Stop-clock” will also apply to the applicant → cumulative response time by applicant limited to **120 working days**.

3 LOCAL EXPERT ASSESSMENT

One local expert assessment will be required to support the submission.

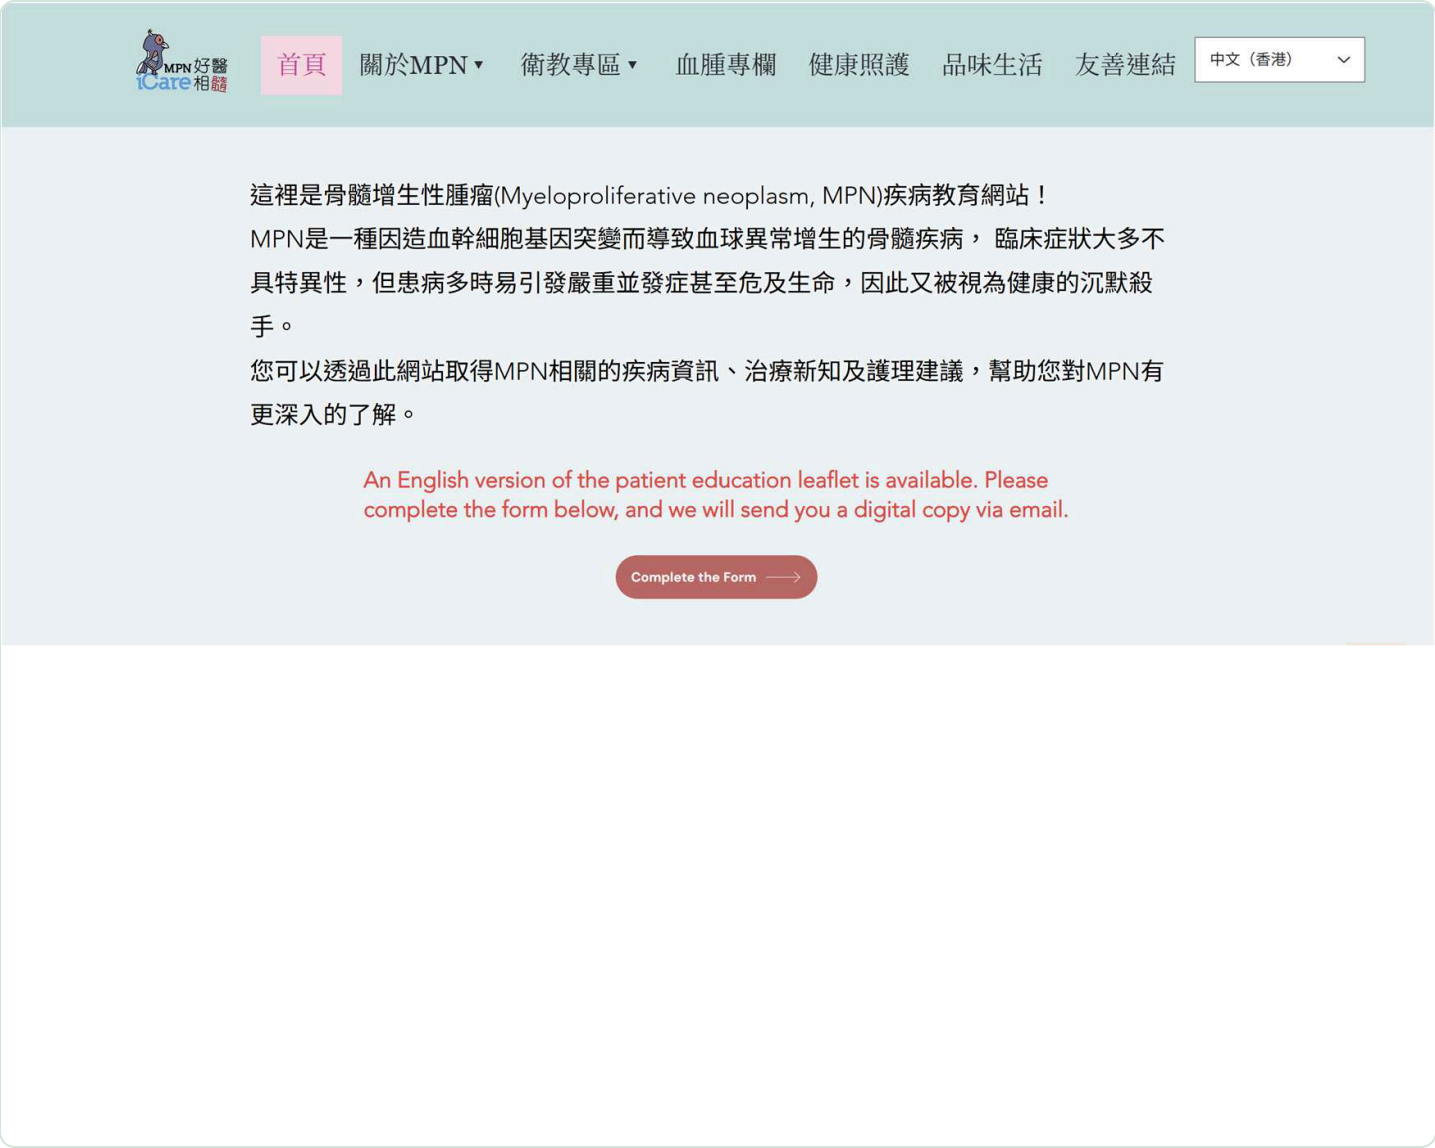

We will ask **Prof. Gill** to support our submission.

Patient Education

1 MPNICARE WEBPAGE

Working with HQ Patient Support team to include Hong Kong specific content to MPNiCare webpage.

Screenshot: current MPNiCare webpage in 中文（香港）.

Research & Development Updates

HOPE PMF

NO UPDATES

No updates.

SURPASS ET

IN PROGRESS

- Inspection Handbook v1.3 is currently under QA team’s review.
- 2nd vendor for SMO service has been sourced; initial quotation was received based on full-time staff model; we are requesting adjustment on the quote for a part-time staff.
- SMO agreement with PAL is under negotiation regarding payment terms and milestone setting.

PRELUDE PV (IIT)

IN PROGRESS

- NDA is under circulation for signature. Initiation meeting with the Clinical Trial Centre and Dr. Wong will be arranged after the NDA execution.
- Still pending Dr. Mak’s reply on the discussion with her team.

PRELUDE PV (IIT)

Questions to confirm

1 Site support

Could we provide the below support to the sites?

- IWRS for randomization
- EDC for data analysis globally
- ICF template

2 Additional site

One more site invitation (Dr. Gill); patient numbers may increase to 18 (if HKU can accept different intellectual property (IP) management).

3 Central system alignment

Should we align with other countries, e.g. Korea, Taiwan, US, for central system?

Thank You

BETTER SCIENCE. BETTER LIVES.
